Standardized Session Process
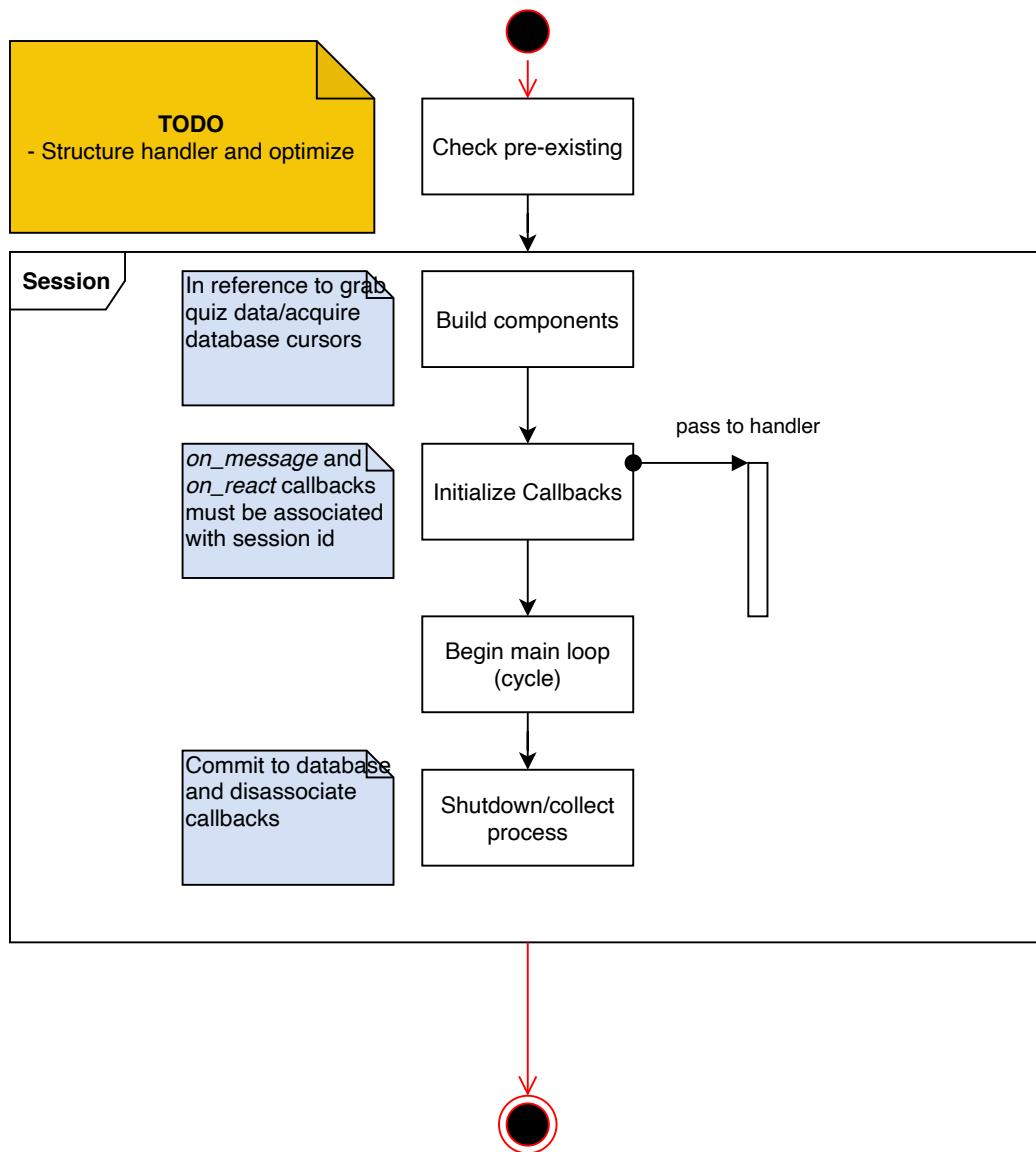

Session build-up and tear-down processes.

Callbac

Some sessions
that cause some

ks

will require *on_message* and *on_react* events
e procedure to occur.

Handler

The handler will
When an event
that event to the
the rest.

TODO
- Structure handler and optimize

Check pre-existing

Session

In reference to grab quiz data/acquire database cursors

Build components

pass to handler

on_message and *on_react* callbacks must be associated with session id

Initialize Callbacks

Begin main loop (cycle)

Commit to database and disassociate callbacks

Shutdown/collect process

nrollment message and is administered the quiz.

nrollment message and is added to the
ue.

quiz editor and issues a command.

organize and keep track of all active sessions.
occurs (e.g. reaction or message), it will pass that
appropriate session and the session will perform
